The INTERIOR FILM decorative film is an innovative material that integrates eco-friendly, flame resistance, waterproofing, moisture resistance, scratch resistance, stain resistance, antibacterial, mold resistance and formaldehyde-free properties. The main component of the product is PVC, serving as a substitute for materials such as wood veneer panels, paint-free boards, and solid wood boards. It can efficiently and rapidly refinish and renovate various material surfaces, offering advantages such as convenience, speed, and cost-effectiveness. It is suitable for interior decoration and design in various occasions. INTERIOR FILM is one of influential brands in this innovative decorative material field. The flame resistance of INTERIOR FILM decorative film meets B1 and A2 levels of GB testing standards, complying with EU environmental standards. The selection of high-quality base film and German glue, which has better performance and stronger adhesion, combining strict and high-tech production processes, provides our products with numerous significant advantages: strong weather resistance, fade resistance, a soft touch, tear-resistant, strong tensile, high temperatures resistance and clear embossing.

PRODUCT PARAMETER:
Thickness: 180UM
Air channel release paper: 140G
Glue Tensile Strength: 2500g-3000G
Cold resistance:-(15-20)
Flame retardant grade: B1/A2
Specifications: 1.22M*50M(accept customization)
